Solutions Engineering Demo Brand Kit

Americans for Ben-Gurion University

Peer-to-Peer Campaign — Brand Kit & Setup Guide

Prospect / Account: Americans for Ben-Gurion University (A4BGU)

Fundraise Up Account ID: ASZYDUNZ

Source site referenced: a4bgu.org

Demo build date: September 2, 2026

Prepared by: Candelaria Paternostro, Fundraise Up

Internal use — for demo preparation and prospect conversations only.

Brand Color Palette

Colors extracted directly from a4bgu.org's live site (header, nav, and primary CTA styles) and carried through the peer-to-peer demo page.

Navy #354D60 Header, nav, footer, section headings, campaign stat band	Navy Deep #2E4455 Hero image overlay / gradient
Red #D92429 Primary CTA buttons (Donate, Start Fundraiser), progress accents	Orange #F68B1F Eyebrow labels, progress-bar gradient, accent details
Body Gray #676767 Paragraph copy throughout	Light Gray #F2F2F2 Alternating section backgrounds

Typography

A4BGU's site uses **Gotham** and **Gotham Light**, both proprietary typefaces not available for hotlinking. The demo substitutes **Poppins** (Google Fonts) — a geometric sans-serif with similar proportions — using weights 300/400/600/700/800 to mirror Gotham Light through Gotham Bold.

If a licensed Gotham webfont is available in FundraiseUp's brand assets for this account, swap the Google Fonts @import in index.html for it to sharpen the match.

Logo

The demo hotlinks A4BGU's own logo asset directly from their site rather than re-hosting a copy:

```
https://a4bgu.org/wp-content/themes/aabgu\_theme.v1.2/img/logo-aabgu-color-tagline.svg
```

Keep clear space equal to the flame icon's width on all sides. Place only on solid white or solid navy (the footer reverses it to white via a CSS filter).

Campaign Identity & Messaging

The demo page positions peer-to-peer fundraising as a natural extension of A4BGU's existing **Way Forward** global campaign and its “**Partners in the Remarkable**” brand tagline — both already live on a4bgu.org — so the experience reads as a continuation of the brand, not a bolt-on microsite.

Messaging pillars used in the demo

- **Eyebrow / kicker:** “Peer-to-Peer Fundraising”
- **Hero headline:** “Rally your community. Power the Negev's future.”
- **Hero subhead:** invites the supporter to launch a personal page tied to the Way Forward campaign goal.
- **Mission tie-in:** “Partners in the Remarkable” framed as an invitation — starting a page turns a supporter's circle into partners in BGU's mission.
- **3-step framework:** Create Your Page → Share Your Story → Rally Support.
- **Closing CTA band:** “Every Fundraiser Brings Us Closer to the Way Forward,” echoing A4BGU's own homepage line, “BGU is forging the way forward, and it simply cannot be done without you.”

All body copy on the demo page is original phrasing inspired by A4BGU's public site content — paraphrased rather than reproduced, per standard demo-build practice.

Fundraise Up Setup Instructions

1. Widget install

The FundraiseUp loader is installed in the `<head>` of `index.html` with Account ID **ASZYDUNZ**, running in **test mode** (`window.fundraiseup_livemode = false`). Flip this to `true` only when the account is ready to go live — leave it as-is for prospect-facing demo walkthroughs.

2. Main Donate CTA

The header utility-bar “Donate” pill and the “Donate Now” buttons link directly to the donor-support checkout link supplied for this build:

```
https://a4bgu.donorsupport.co/-/XYGZBWXX
```

3. Peer-to-Peer “Start Your Fundraiser” CTAs — action needed

No P2P campaign snippet was provided for this build, so the “Start Your Fundraiser” buttons (hero, CTA band, and each featured-fundraiser card) currently call `FundraiseUp.openCheckout()` as a functional placeholder. Before presenting this demo live:

- Create the Peer-to-Peer / Team Fundraising campaign in the FundraiseUp dashboard for account ASZYDUNZ.
- Copy the campaign's fundraiser-registration URL or embed snippet from the dashboard.
- Replace the `onClick="FundraiseUp.openCheckout()"` calls in `index.html` with that link/snippet so “Start Your Fundraiser” opens real P2P page creation instead of a standard donation checkout.

4. Featured fundraisers & stats

The three fundraiser cards (Team Beer-Sheva, The Negev Neighbors, Class of 2010 Challenge) and the campaign progress numbers (\$159K of \$250K, 86 pages, 1,240 donors) are illustrative placeholders built for this demo. Swap in real supporter names/photos and live totals once an actual P2P campaign is running, or pull them dynamically from FundraiseUp's reporting API for a production build.

5. File & hosting notes

- Single self-contained file: `index.html` — all CSS is inline, no external stylesheet files.
- Images are hotlinked directly from `a4bgu.org` (hero photo, logo) rather than re-hosted, per standard practice for these demo builds.
- Fonts load via a Google Fonts `@import` for Poppins.
- Deployed via GitHub Pages from the existing `candelariapaternostro-collab/demo` repository.

6. Repo housekeeping — needs your decision

This repository previously hosted a demo for **Solidarity Bridge** (ways-to-give/ page and its brand kit PDF). File deletion was blocked by permission controls during this build, so those files are still present alongside the new A4BGU page. Confirm whether to remove them, or keep this repo single-purpose per client going forward.
